ASSIGNMENT AND/OR COURSE OUTLINE

GRADING CRITERIA FOR NUMERICAL CALCULATION:

You will receive three grades total for this course: They will each receive equal weight.

- Task 10.2.2 Plan Book*
- Task 3.1.2 Journals *
- Attendance in seminars (divide 100 pts by total of scheduled seminars = number of attendance pts/semester)

*Tasks must meet the criteria for “demonstrated” as determined by the scoring rubric to earn credit for this course. A task judged as “partially demonstrated” or “not demonstrated” must be resubmitted for the purpose of demonstrating the accomplished practice indicator. The original grade will be used when calculating the course average. Points will not be deducted or added for resubmission.

No grade will be given for the course until all tasks have been successfully demonstrated AND an acceptable formal reflection submitted with it.

The Chipola Catalog provides policies and procedures regarding the grading system. A student’s Grade Point Average is derived from the grading system/quality point scale.

Course Requirements:

Task 10.2.2 Plan Book
This is a simple task that will allow you to document during an entire semester how you are able to plan on a continuous basis and are capable of changing as needed. You will develop a teacher plan book to record your instructional activities. Make sure you indicate how you are gradually taking over responsibility in the classroom and when you are teaching full-time. Lesson plans should be ready at least two days in advance. Lesson plans should include differentiation of instructional activities, assessment and/or progress monitoring tools. The plan book will be checked periodically when supervisors are in your classroom (so it should be available and with you at all times) and turned in at the end of the semester.

Task 3.1.2 Journal
You need to keep a dated journal of your student teaching experiences. At least once per week (a minimum of 16 dated entries), you will reflect on your experiences, jot down ideas for what you wish to do in your classroom, engage in self-evaluation, and consider underlying assumptions you are making about content areas, teaching, schools, and students. The journal should help you formulate and refine your philosophy of education and must be visible and available at each observation to be checked. Therefore, it should reflect continued growth in the internship. This will be checked periodically when
supervisors are in your classroom (so it should be available and with you at all times) and turned in at the end of the semester.
