A team of professionals from the Chipola College Health Science department including nursing faculty, patient simulation coordinator, paramedic instructors and the director, attended the Human Patient Simulation Network (HPSN) conference in Tampa. Some 1,000 health professionals attended the international conference which included numerous training sessions on the application and learning environment related to human patient simulators.

The Chipola team presented a scenario using an interdisciplinary approach to learning. The scene began with a video clip from the Sandra Bullock movie “28 Days.” The character was drinking and driving with cocaine use.
