This Associate in Science degree program prepares students for employment as managers in a variety of business environments, such as an owner/manager for a small business, or for continued education beyond the Associate degree level.

Students who plan to pursue a bachelor’s degree in any area of business at a four-year college or university may instead fulfill the Associate in Arts degree requirements for a major in Business at the chosen transfer school.

The courses listed on this guide are not to be construed as a contract between the student and Chipola or the University. Course requirements may change each year. You are encouraged to work closely with your advisor.

1 Non-credit college-prep reading, writing, and/or math courses may also be required, depending on placement test scores.
