This Associate in Science degree program prepares students for entry-level positions as microcomputer support specialists, help desk representatives, and software application technicians.

Students who plan to pursue a bachelor’s degree in computer science, information technology, or information systems management at a four-year college or university should instead fulfill the Associate in Arts degree requirements for the chosen transfer school.

For more information, visit the Occupational Outlook Handbook website.

The courses listed on this plan are not to be construed as a contract between the student and Chipola or the University. Course requirements may change each year. You are encouraged to work closely with your advisor.

This program is set up for Fall initial enrollment. Courses other than General Education are usually offered only once a year and proper sequencing is required. Students planning to enter during Spring or Summer may complete General Education courses before other courses. Contact a departmental advisor about recommended sequence.

Course numbers in bold indicate courses that are offered only once per year. Students in this program must work closely with a departmental advisor for course sequencing.
