Guidelines for Final Project

1. The lesson must be in Powerpoint.
2. The first slide must identify the title of the lesson in Word Art with your name underneath it.
3. The second slide must have the Sunshine State Standard that it teaches. The Sunshine State Standard must have the identifying number and the benchmark must be written out.
4. The presentation should contain at least fifteen slides.
5. Your lesson can be original or one adapted from another source. If you adapt one, include the documentation of the source.
6. You must have transitions between your slides.
7. You should have some animations. You will be graded on the appropriateness of the animations in presenting the material rather than the number.
8. You must have a least one picture from the WWW, digital camera or scanner. (On the last slide (It will probably say “The End”) include the address of the picture or indicate if the picture was taken or scanned.)
9. You should have one EXCEL chart in your presentation. It can be used for any purpose: representing data, showing the grading percentages, presenting information, etc. Turn in your EXCEL worksheet with your Powerpoint printout.
10. You should include one Inspiration diagram in the powerpoint presentation. The inspiration diagram does not have to include pictures.
11. The lesson must have a review where you ask the students to offer some response to the concepts you have taught in the lesson or gives an assignment that would be appropriate to the lesson and the SSS.
12. Your lesson should be different from the Powerpoint lesson that you did in class or for your Individual assignment.
13. Your lesson should be printed (six slides to a page) and turn in before or at May 1 by 2:00 (the scheduled final examination period) and should also be e-mailed to me.
