

This Associate in Science degree program focuses on computer systems and network support.

Students who plan to pursue a bachelor's degree in Computer Information Systems or Management Information Systems at a four-year college or university should fulfill the Associate in Arts degree requirements for the chosen transfer school.

This academic plan is set up for Fall initial enrollment. Course numbers in bold indicate courses that are offered only once per year. Students in this program must work closely with a departmental advisor for proper course sequencing.

For more information, please visit the [Occupational Outlook Handbook](#) website.

*While academic advisors, faculty and staff provide significant academic planning and related assistance to students, completion of all degree requirements, and the process of monitoring progress to that end, is ultimately the responsibility of the student.*

## ACADEMIC PLAN: Associate in Science Degree

# Network Systems Technology: Digital Forensics

**Code** 2183 **Program Length** 60 credits

## Entrance Requirements

This program prepares students for entry-level positions as microcomputer support specialists, help desk representatives, and network support technicians. Content includes topics and skills emphasized in various industry certifications including the CompTIA A+, Security+, and Network+, as well as various Microsoft network certifications (MTA, MTICP). Students holding valid current IT industry certifications should contact a departmental advisor about credit that may be awarded for selected courses based on such certifications.

All Associate in Science degree students must complete the required English and mathematics courses with a grade of "C" or higher.
